

Versant Power 2025 Sustainability Report Highlights

Versant Power is a regulated electricity transmission and distribution utility in the state of Maine, owned by ENMAX Corporation.

As the second-largest utility in the state, we provide electricity and customer care services to residential, commercial and industrial customers in northern and eastern Maine. Versant Power is fully regulated by the Maine Public Utilities Commission and the Federal Energy Regulatory Commission.

We continue to advance our sustainability practices and performance. Below is a selection of highlights from our activities included in the ENMAX 2025 Sustainability Report, which illustrate some of our accomplishments.
