

# No. 1 Substation Replacement Project

## Time Extension Application

Artists Rendering

### PROJECT OVERVIEW

ENMAX Power Corporation (ENMAX Power) owns and operates ENMAX No. 1 Substation currently located at 738 9 Ave SW. To ensure the continued reliability and integrity of ENMAX's transmission system, ENMAX Power applied to replace the ENMAX No. 1 Substation (the Project) in 2019. ENMAX Power received approval for the Project in 2021 and has since begun construction of the new ENMAX No. 1 Substation at 830 9th Ave SW (directly west of the existing ENMAX No. 1 Substation).

The original Project approvals required construction to be completed by October 31, 2025 and all salvage activities to be completed by February 28, 2026. Engineering and procurement timelines have delayed completion of the Project and therefore, ENMAX Power intends to file an application with the Alberta Utilities Commission (AUC) to request a time extension to complete the construction and salvage activities associated with the Project.

### PROPOSED SCHEDULE

ENMAX Power plans to file a checklist application for the Project with the AUC in Q2 2025 to request construction of ENMAX No. 1 Substation to be completed no later than December 31, 2026. ENMAX Power will also propose that all salvage activities be completed by no later than April 30, 2027. Stakeholders are encouraged to consult the webpage for the most up-to-date construction information.

For more than 100 years,  
ENMAX Power has delivered safe  
and reliable electricity in Calgary.

## CONSTRUCTION METHODS

In addition to constructing the new substation building, ENMAX Power will need to relocate, install and replace transmission lines and associated infrastructure. Once the new ENMAX No. 1 Substation is energized, ENMAX Power will carry out salvage activities at the current ENMAX No. 1 Substation site. For both the construction and salvage activities, ENMAX Power will continue to require periodic road and lane closures for roadways adjacent to the project site.

ENMAX Power continues to work with stakeholders and The City of Calgary to minimize the impact to residences, businesses, and commuters in the area. ENMAX Power will also ensure a safe environment for workers and the public during ongoing construction.

## COMMITMENT TO COMMUNITY

We are committed to being a responsible corporate neighbour. Our commitment includes providing timely and meaningful engagement with stakeholders about our projects and applications. We provide opportunities for stakeholders, including residents, occupants and landowners, to be informed about our projects and applications, and to engage with us at all stages.

## ABOUT ENMAX CORPORATION

The ENMAX group of companies is a provider of electricity services, products and solutions. We are headquartered in Calgary, Alberta, with operations across Alberta and Maine. Through our subsidiaries, ENMAX Power Corporation and Versant Power, we own and operate transmission and distribution utilities that safely and reliably deliver electricity to customers in Calgary and northern and eastern Maine. Through ENMAX Energy Corporation, ENMAX owns and operates power generation facilities and offers a range of electricity and natural gas products and services to residential, commercial and industrial customers across Alberta. ENMAX is a private corporation and The City of Calgary is its sole shareholder.

## CONTACT INFORMATION

Your input is valuable to us. We will ensure you get answers to your questions and your concerns are understood. For more information about the proposed Project, please contact:
