

NW CALGARY TRANSMISSION LINE RELOCATION PROJECT

What's happening?

In Q4 2023, ENMAX Power will be upgrading existing electrical infrastructure and installing new transmission structures in the communities of Varsity, Dalhousie, Brentwood, Charleswood and Collingwood.

Why?

Transmission line 16.61L has provided electrical services to Calgary's northwest since the early 1960s. By upgrading this infrastructure, ENMAX Power can continue to deliver safe and reliable power.

NW CALGARY TRANSMISSION LINE RELOCATION PROJECT

What to expect:

- Prior to construction activities, you may notice ENMAX Power and contractor vehicles, personnel, and utility locate markings in the area.
- If your property is affected by construction for this project, you will receive advance notification.
- Following construction activities, ENMAX Power will restore affected areas to City of Calgary remediation standards.
